

Lab: HTML/CSS3

- **HTML Basics**

1.1: Create HTML Page

Create a web page to display the text 'This is the first html page created'.Solution:--

Figure 1: First.html in a browser

1.2 Example: MyFirstPage.html

Figure 2: MyFirstPage.html Output

1.3 Example: Headers.html

Figure 3: Headers.html Output

1.4 Example: Address.html

Example 3: Address.html

Figure 4: Address.html Output

1.5 Example: PreFormattedText.html

Figure 5: PreFormattedText.html Output

Problem 1: Resume Creation <<To Do>>

Problem Statement:

Create your resume page as per the format shown in the figure that follows.

Figure 6: Resume Page

Creating Tables

Goals	At the end of this lab session you will understand:
	• Attributes of a Table • Table Headers • Table Data • Table Formatting • Control Table Borders

	Grouping of Columns
Time	90 minutes

Problem 1: Fun with Food

Problem Statement:

Create a web page, which uses a table with columns *Fruit*, *Color* and *Cost per pound* as shown in the figure that follows.

Fun with food		
Fruit	Color	Cost per pound
Grapes	Purple	1.25
Cherries	Red	154.79
Kiwi	Brown	10.00
This is the footer area		

Figure 7: Fruits Table

Solution

Step 1: Write the following code in **Notepad** and save the file.

Example 5: Fruit Table

Problem 2: Table Heading << To Do>>

Problem Statement: Create a html page. When this page is opened in a browser, it should appear as shown in the following figure

Product Table

Product	Price	Quantity	Amount
P001	1000.00	12	12000.00
P002	2000.00	10	20000.00
Total	3000.00	22	32000.00

Figure 8: Product table

Note: Table heading - Background color is: navy and font color is: white.

Problem 3: Calendar <<To Do>>

Problem Statement:

Design a web page to display a calendar for a month using html table.

Figure 9: Calendar

Note: Background colors to be used: For all the Sundays: green, for all the Saturdays: aqua, for 1, 26 Jan: yellow

• Working with Lists

Goals	At the end of this lab session you will be able to use following types of lists: • Numbered List • Bulleted List • Directory List
--------------	--

	• Glossary List
Time	30 minutes

Problem 1: Types of Lists

Problem Statement:

Design a web page as shown below

The following is a demonstration of various list styles

An ordered list i.e. using OL and LI

9. Seepz
10. TTC
11. MIDC

Unordered list i.e. using UL and LI

- Seepz
- TTC
- MIDC

Figure 10: List

Problem 2: Subjects <<To Do>>

Create a web page to display a list as shown in the figure that follows.

Display the list of Subjects using List

1. Language
 - i. English
 - A. Prose
 - B. Poetry
 - ii. Hindi
 - A. Prose
 - B. Poetry
 - iii. Marathi
 - A. Prose
 - B. Poetry
2. Social Study
 - i. History
 - ii. Geography
3. Science
 - i. Physics
 - A. Part1
 - B. Part2
 - ii. Chemistry
 - A. Organic
 - B. Inorganic
 - iii. Biology
 - A. Botany
 - B. Zoology
4. Maths
 - i. Algebra
 - ii. Geometry

Figure 11: Subject list

Solution

- Open **Notepad**. Type the code and save the file.
- Open the page in browser.
- Check the page shown in the browser and verify that it is as per the requirement.

•

• Working with Links

Goals	
	At the end of this lab session you will be able to: • Create links to web documents.

	• Create links to email. • Create hyperlinks for lists and table data. • Provide target for hyperlink.
Time	30 minutes

Problem 1: Welcome to Big Company

Problem Statement:

Design a simple home page for a company with a heading and 3 links – About, Products, Contact as given in the figure below.

Figure 12: Big Company home page

When you click the “About” hyperlink, following page should be displayed.

The Big company was founded in 1956.

Figure 13: About

When you click the **Back** button on the browser toolbar, they should be redirected to the page *prob1.html*. Click the “Products” hyperlink to reach the following page:

The following are the products offered:

- Personal Health
- Beverages
- Garments
- Books

Figure 14: Products

When you click the **Back** button on the browser toolbar, they are redirected to page *prob1.html*. Click the “Contact” hyperlink. It opens Outlook Express and the e-mail address given in the *To* field, which is Ind.in@capgemini.com in the following illustration, is displayed in the New message window. This email address is specified in the *mailto* attribute.

Figure 15: Contact

Problem 2: Employee Details <<To Do>>

Problem Statement:

Design a simple home page for a company to display employee details as given below.

Empcode	Emp Name	Dept Code	E
1001	Kiran Rao	10	8 Yrs.
1002	Aamir Khan	20	5 Yrs.
1003	Ishita Shah	30	10 Yrs.

Figure 16: EmployeeDetails

When you click the department code “10” hyperlink, page with following content should be displayed.

Figure 17: Sales Department

When you click the department code “20” hyperlink, page with following content should be displayed.

Figure 18: Training Department

When you click the department code “30” hyperlink, page with following content should be displayed.

Figure 19: Accounts Department

-
- **Image Handling**

Goals	At the end of this lab session you will be able to: • Understand the use of inline images. • Attributes of an inline image. • Text and image aligning. • Use of an image as a hyperlink.
Time	30 minutes

Problem 1: Images with Clickable Areas <<To do>>

Problem Statement:

Create a web page with some images as shown in following figure:

Figure 20 : Images

-
- Working with Frames

Goals	At the end of this lab session you will be able to: • Understand the need for frames in web pages. • Create and work with frames. • Manage large content with frame.
Time	30 minutes

Problem 1: Frames

Problem Statement:

Create a web page which allows you to click on 2 hyperlinks courses, menu in the frame on the left. When you click a link, the details are displayed in the frame on the right. The file layout.html is loaded in the frame on the left.

Figure 211: Frames

When you click the link “courses”, the details are displayed in the frame on the right.

Figure 222: Courses

When you click the link “menu”, the details are displayed in the frame on the right

Figure 233: Menu

- **HTML Forms for User Input**

Goals	At the end of this lab session you will be able to: • Understand the role of forms in web pages. • Understand various HTML elements used in forms. • Develop HTML forms in web pages.
Time	45 minutes

Problem 1: Form

Problem Statement:

Design a web page *prob1.html* in the directory *lab7*. When *prob1.html* is opened in the browser, the page is displayed as shown in the figure that follows.

Enter the password Enter your surname:

Enter ur address

Address :

Select the training programs attended :

☐ COBOL ☒ IDMS ☐ Java

Select the group you belong to : ☐ Group 1 ☒ Group 2 ☐ Group 3 ☐ Others

Which training program would you like to attend ?

Browse...

Figure 244: Forms

Problem 2: Employee Details <<To Do>>

Problem Statement:

Design a web page *prob2.html* to accept the following employee details:

- Employee Name (Max 20 characters).
- Employee Code (Max 4 characters).
- Department (Use radio buttons).
- Date of Join (Use the format dd/mm/yyyy).
- Address.
- Training programs attended (Use check boxes).
- Training programs need to attend (Use select box).
- Send the information at empinfo@capgemini.com.

Name	
Employee Code	
Department	☐ Admin ☐ HR ☐ Technical ☐ Accounts
date of Joining	1 01 2014 dd mm YYYY
Address	
Training Program attended	☐ HTML/DHTML ☐ Java ☐ Client/Server ☐ .NET
Training program need to attend	JavaScript
Send the information at	empinfo@capgemini.com

Figure 255: Employee Details

Solution

- Open **Editor**. Type the code and save the file as lab7\prob2.html.
- Open the page in the browser.
- Verify if the output is as per the figure.

-
- **New Form Elements**

Goals	At the end of this lab session, you will be able to: • Develop web pages using HTML5 enhanced form elements
Time	120 minutes

Problem 1: Form

Problem Statement:

Design a web page *prob1.html* in the directory *lab8*. When *prob1.html* is opened in the browser, the page is displayed as shown in the below figure

Placeholder :

Autofocus :

Range :

Search :

Date :

Week :

Month :

Time :

Figure 266: New Form Elements

Problem 2: Candidate Details <<To Do>>

Problem Statement:

Design a web page StudentInfoForm.html to accept the following student details:

- Name (Accept only characters , Max 15 characters)
- Password (Max 15 characters)
- Phone number(Accept 10 digits)
- Gender (Make use of radio button)
- Date of Birth (Make use of date field and date of birth should not be greater than current date)
- Email (Accept valid Email)
- Highest Qualification (Make use of datalist to populate data like B.Tech, M.Tech, MBA, MCA, MSc, MA, BSC..)
- Courses interested in (Make use of check box)
- Comments to mention regarding Degree / External Certificates (Make use of textarea)
- Uploading Degree / External certificates (Make use of file input type)
- Use Placeholders to describe the type of input.

- All fields marked (*) are mandatory

Candidate Information

Name: *	
Password: *	
Phone number: *	
Gender: *	☐ Male ☐ Female
Date of Birth: *	mm / dd / yyyy
Email: *	
Highest Qualification: *	Select Highest Qualification ▼
Courses Interested in: *	☐ Java ☐ HTML 5 ☐ CSS 3 ☐ Angular
Comments: (Mention External Certifications if any)	
Upload Degree / External Certificates: *	Choose Files No file chosen
	Submit Information Clear

All fields marked (*) are mandatory
